

STEPHEN TURLEY

Resume

Name: Stephen David **TURLEY**
Address: 29 Hillsden Road Darlington Western Australia 6070 Australia
Telephone: 08 9299 6980
Mobile: 0417 173 646
Email: stephen@torridon.com.au
Website: www.torridon.com.au
Marital Status: Married
Nationality: Australian & British
Year of Birth: 1954
Company: **Torridon Exploration**, ABN 34 074 071 551

Self Assessment: Well organized, professional, good communication skills - both written & oral. Reliable & honest, can work effectively with minimal supervision within set parameters. A broad experience in terms of commodities & levels of exploration, from project generation to advanced exploration, has made me capable of undertaking almost any mineral exploration task. Specialist areas: project assessment, tin, tungsten, nickel, deeply weathered terrains, remote area exploration.

EXPERIENCE

1995 to present; consultant geologist, for numerous clients. This work included: project generation, detailed evaluations of prospects, assessing diamond databases for non-diamond commodities, writing "independent geologist's reports" for prospectuses, project acquisitions, advising companies on exploration methods, supervision & execution of field work, administering company's exploration projects, geochemical sampling. **Commodities included: tin, tungsten, nickel, molybdenum, REEs, PGEs, gold, base metals, phosphates & diamonds.**

1991-1995, Senior Exploration Geologist – Nickel with **Outokumpu**. In charge of exploration at the Forrestania Nickel Project. Supervising a large exploration programme, budget & team. Overall responsibility for mineral exploration, budgets, tenements, staff & contractors. Key parts of the programme were the implementation of a major geological mapping, percussion & diamond drilling, regolith studies, feasibility studies, developing data collection protocols & liaising with the CSIRO on their research project.

1990-1991, Contract Geologist working on gold & diamond exploration projects in WA.

1986-1990, Senior Geologist with **Metana Minerals NL**, initially working on gold projects at Mt Magnet, Ravensthorpe & the Wheatbelt of WA. Later working with Metana's diamond team on projects in the Kimberley & Gascoyne districts of WA & in South Australia. This work also involved visiting & sampling most known lamproites & kimberlites.

1985-1986, Project Geologist, **Sons of Gwalia Limited**, working on gold projects in the Meekatharra area of WA.

1984-1985, **Kulim Limited's** Geologist exploring the company's gold projects including the discovery & development of the King of The Hills (Tarmoola) gold deposit at Leonora.

1980-1984, Project Geologist with **Geopeko**, working on: the base-metal (Woodcutters), gold, diamond & tungsten-molybdenum (Molyhil) projects in the Northern Territory, a review of the phosphorite potential of eastern Australia from Sydney & tin-tungsten & base-metal projects in Tasmania.

1978-1979, Geologist with **Cominco** working throughout the UK on base-metal, gold, uranium & barite exploration.

QUALIFICATIONS

BSc (Hons) Geology, University of Aston in Birmingham UK
MSc Mining Geology, Leicester University UK

PROFESSIONAL BODIES

Member of the Australian Institute of Geoscientists – MAIG
Member of the Geological Society of Australia
